A;Description: mediates cell iron uptake by binding, internalizing C;Superfamily: transferrin receptor c;Keywords: glycoprotein; iron transport; receptor; transmembrane F;1-57/Domain: intracellular #status predicted <INT> F;20-24/Region: tyrosine-based endosomal/lysosomal sorting signal F;58-61/Region: stop-transfer sequence F;62-89/Domain: transmembrane #status predicted <TMS> F;62-89/Domain: transmembrane #status predicted <TMS>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              A; Molecule type: mRNA
A; Molecule type: mRNA
A; Residues: 1-19, 'C', '21-61 <ALV>
A; Residues: 1-19, 'C', '21-61 <ALV>
A; Note: mutant defective in endocytosis
C; Comment: This transmembrane glycoprotein exists as a dimer try acyl groups. The amino end of each chain lies within the embrane, may also serve as an internal signal sequence.
C; Comment: The expression of this receptor, involved in the r
